***Scottish Housing Quality Standard (SHQS) – Stock condition survey information (Indicator C24)***

**Please state:**

C24.1 The date your organisation's stock was last surveyed or assessed for compliance with the SHQS

March 2018

C24.2 What percentage of stock did your organisation fully assess for compliance in the last four years?

3.34

C24.3 The date of your next scheduled stock condition survey or assessment

September 2018

C24.4 What percentage of your organisation's stock will be fully assessed in the next survey

1.67

C24.5 How did your organisation use the survey data stated at C24.2 to establish how the stock complied overall with the SHQS

Only 10 out of 299 self-contained properties had been carried forward from earlier reviews/ returns as having SHQS compliance issues. These were older stock transfer properties, which despite comprehensive modernisation in 2010/11 had failed to achieve necessary EPC ratings - due to manufacturers SANYO not having achieved MICS/ BRE registration for the heat pumps installed here - their ECO range. (As a result EPC's have been calculated using unfavourable default settings which do not adequately reflect potential heat pump performance). We were subsequently able to arrange installation of solar PV panels in 2014/15 for 5 of these properties but could not do so for the remaining 5 due to their being in Conservation Areas. Although these 5 properties have been recorded as exempt meantime, we have been working with our specialist consultants Renewable Heat Strategies and their suppliers Ocean Air to scope out potential for replacement of their SANYO heat pumps. We had optimistically included within last year's ARC return our aspiration to secure upgrade for these remaining 5 properties in this financial year. Unfortunately, we have so far failed to identify an alternative which is compatible with the integrated SANYO water tanks which we'd need to retain to secure a viable upgrade, and which can deliver the necessary uplift in EPC rating. We continue to look for a viable upgrade solution, and would hope to do so by March 2020 if possible. However, it

seems unrealistic meantime to re-include provision for the 2018/19 financial year as we do not as yet have a costed viable solution.

**Scottish Housing Quality Standard (SHQS) – Working towards the standard  
(Indicator C27)**

**Please state:**

C27.1 How many properties did your organisation plan to bring fully up to the SHQS during the reporting year?

5

C27.2 How many properties did your organisation fully bring up to the SHQS during the reporting year?

0

C27.3 If C27.1 and C27.2 are not the same, please provide an explanation for the difference

See comment above at C24.5.

These 5 properties have been deemed exempt on grounds that whilst could be done the costs would be disproportionate (given significant investment already made in modernisation in 2010/11, which included external insulation and heat pump central heating) - see C28.1.3 below.

Inclusion had been aspirational, as we are reluctant to deem them permanently exempt, and at the time of our return had identified what we'd hoped would be a viable upgrade option for installation in 2017/18.

Unfortunately, it wasn't. Efforts to identify a viable solution continue, with our specialist consultants Renewable Heat Strategies and their suppliers Ocean Air. However, for this year's return, as we do not currently have a costed option which we believe to be viable, we have not re-included upgrade proposals meantime for 2018/19.

Ultimately, we still hope to secure viable upgrade and compliance for these units- if possible during the following year 2019/20.

C27.4 How many properties does your organisation plan to bring fully up to the SHQS during the next reporting year?

0

C27.5 The number of properties at C27.4 should equal the difference between the projected pass rates for the end of the reporting year and the end of the next reporting year (as reported at C25.5). If it does not, please explain the difference
